APPLICATIONS MUST BE RECEIVED AT CONCORD HEADQUARTERS
NO LATER THAN SEPTEMBER 9, 2024

.....
NOTICE

NH Fish and Game Department rules governing trapping are included for your information. Note that if a nuisance beaver problem occurs within ANY state managed trapping unit, the permittee that has been assigned to that unit shall be required to initiate actions to eliminate the nuisance beaver within 7 days of being notified by the Department. Failure to initiate actions may result in the Executive Director removing the trapping unit(s) issued to a permittee. Sites known to have a history of nuisance beaver problems are referenced on the list of available lands.

.....

State Managed Lands Open to Trapping

The Wildlife Division of the NH Fish and Game Department issues trapping permits to trap on Fish and Game owned and leased lands, state forest and park lands, dam sites administered by the NH Department of Environmental Services, select properties owned by other agencies of the state of New Hampshire, Army Corps of Engineers Flood Control Areas, and White Mountain National Forest Lands.

Permits are issued for all available properties for the period of October 1, 2024 through September 30, 2026. Any permits issued after the lottery will expire on September 30, 2026. Properties with large acreages are broken into nonoverlapping units. No more than one trapper will be issued a permit for the same trapping unit.

Application Procedures

1. Trappers must submit a completed application for the current year's lottery, including a listing (in order of preference) of the trapping units that he or she wants to trap. Each trapper may designate up to two licensed helpers. A current year trapping license is required when applying.
2. A list of available units, which provides the location and trapping restrictions for all units, is attached to this application, and is available on the NH Fish and Game website at www.HuntNH.com (follow the link for hunting and then look for trapping information) or may be requested from the Wildlife Division. Maps of trapping units are available on the Department's website, or open to public inspection during regular business hours at Fish and Game Headquarters in Concord.
3. Trappers have an obligation to locate all trapping units indicated on their application prior to application submission. Do not apply for units you do not intend to trap.
4. The lottery drawing will take place on September 13, 2024. Permits will be mailed within 10 working days of the lottery.
5. All trapping units not issued in the lottery will be available on a first-come-first served basis at NH Fish and Game Headquarters, Wildlife Division. Check the website to verify permit availability before applying.

Regulations and Penalties

1. An annual harvest report form is given out with each trapper license. This form must be completed and returned to the Wildlife Division by April 30th each year, even if nothing was caught or no trapping was done.
2. Permits may be revoked at any time during the permit period for reasons including but not limited to failure to send in a report form, failure to purchase a trapping license by October 10th of the second year of the permit, failure to control nuisance beaver populations, or conviction of a trapping violation by the trapper.
